

Quality Policy, Environment and Energy

We forge value relationships through integral and sustainable solutions according to the following guidelines:

- Comply with operational excellence that streamlines our processes making our company more competitive, **continuously improving quality, environmental and energy performance**
- Fulfill the requirements of our customers, **beyond the quality requirements, on time deliveries, critical and safety features.**
- **Meet applicable legal requirements, such as the use and consumption of energy in which the organization is involved, continuously improving the use of energy resources optimizing the technology and the design of processes; supporting the acquisition of products and services that are energy efficient.**
- Comply with our staff, giving the training and preparation necessary to always be providing the best service to our customers with the most advanced technology in our processes and taking care of the use of innovation in the implementation of disruptive processes.
- **Ensure the availability of the information and resources necessary to achieve the established objectives, including:**
 - **Energy efficiency**
 - **The use and consumption of energy**
- Comply with the environment protection; preventing pollution through the sustainable and rational use of the resources, meet with the current environmental legislation and other requirements relevant to our organizational context. Through the implementation, operation and continuous improvement of the Management Systems.
- Comply with our stockholders, paying with economic benefits and with the profitability of their financial expectations, with risk measurement according to market behavior.
